FIFTH ANNUAL CLEANUP CAMPAIGN
SANTA MARTHA CAVE
Grupo Pionero Espeleológico de Sonora
International Year of Caves and Karst

REPORT EVENT
October 30th, 2021

Members of the Grupo Pionero Espeleológico de Sonora, as well as attendees, went to the Santa Martha cave to clean up.

The cave is a popular attraction in Hermosillo and serves as a shelter for animals, including bats. We obtained two garbage bags, from which we removed an amount of glass, plastics, clothing, and metal fragments.

The cave is a natural shelter. For that reason, it is critical to preserve it. Getting only two garbage bags showed us the positive results of the clean and well-maintained process since 2016.

We want to express our gratitude to all of the attendees for their invaluable assistance! We will see you until next year for the sixth cleanup!

Special thanks to Karla Acosta of Proyecto Puente for joining the Fifth Annual Cleanup campaign. Here is the link where you can see her coverage of the activity. Proyecto Puente
